

## **Member Working Group - Review of Car Parking in Boston**

### **Recommendations**

That the Cabinet:

1. Focus a green strategy on its car parks and continues to support the volunteer time being invested in its sites with refuse collection, planting, and maintenance;
2. That resources are set aside to reline the Cattle Market car park to offer larger parking spaces for the improved amenity of customers. That the trail be monitored to inform whether similar changes can and should be made to other Council car parks;
3. Undertake a signage review with particular reference to routing visitors to its own car parks and pricing structures;
4. Undertake a parking fees and charges review, including exploring the introduction of shopper and commuter passes that can all be purchased via the MiPermit app and the Council's new parking machines; and
5. That the Portfolio Holder both support and actively promote the recommendations of the working group.
